

Adeka Nol GT-730

-INCI Name: PEG-240/HDI COPOLYMER BIS-DECYLTETRADECETH-20 ETHER

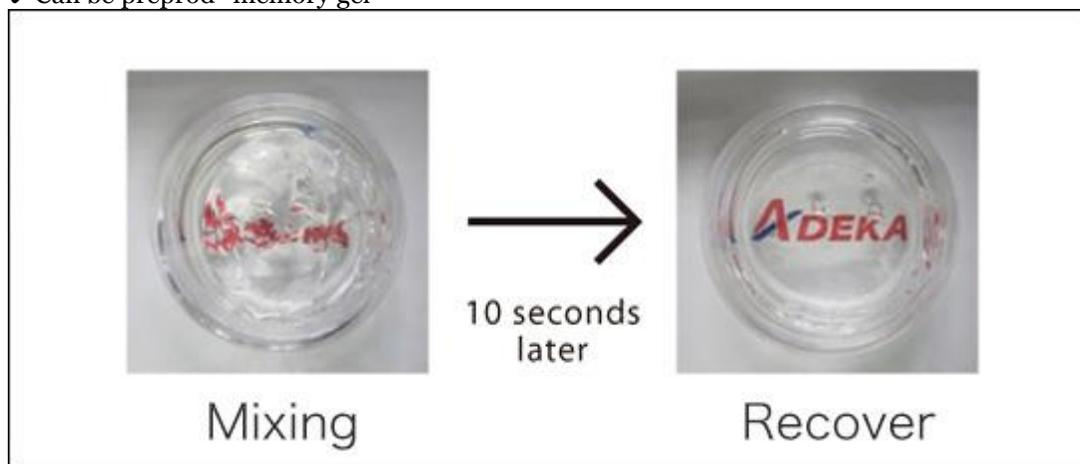

-CAS Number: 428442-71-1

-Product Description: ADEKA NOL GT-730 is a water-soluble polymer which has urethane bond in the structure. It associates water molecule and show thickening effect on water by forming water gel. It is used for cosmetics as gelator. ADEKA NOL GT-730 is diluted product of GT-700 with butylene glycol and water. Effective component of both products is same.

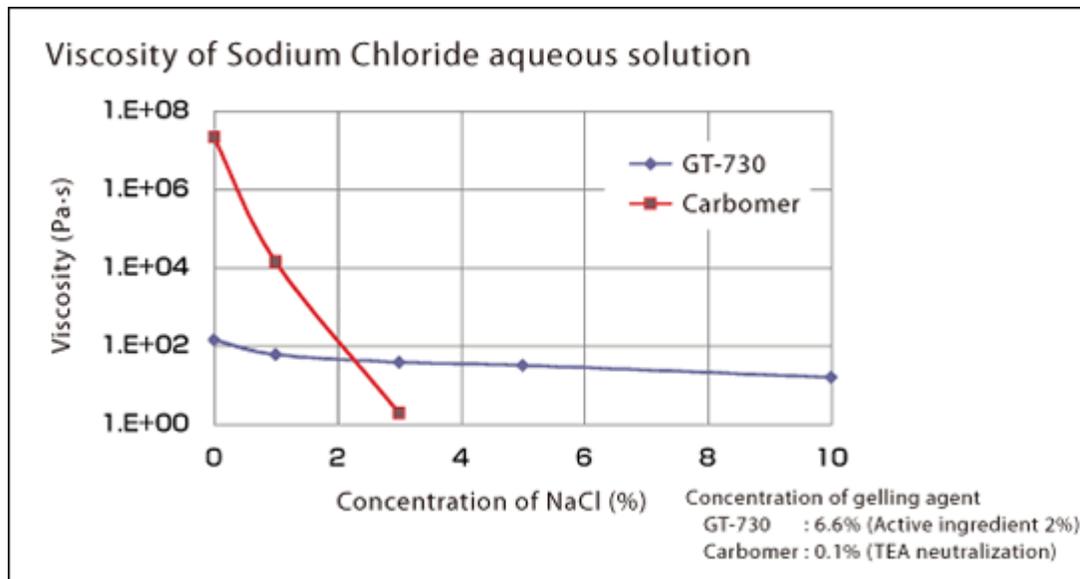

-Packing Size: 20kg/can

*Features

- ✓ High-elastic / Springy water gel
- ✓ Good spray discharge
- ✓ Salt tolerance
- ✓ Good solubility in water
- ✓ BHT free
- ✓ Can be preprod "memory gel"

✓ADEKA NOL GT-730” is the best gelator for cosmetics which contain various salts

***Composition Data**

INCI Name	Compositions (wt%)
PEG-240/HDI COPOLYMER BIS-DECYLTETRADECETH-20 ETHER	30
BUTYLENE GLYCOL	50
WATER	19.94
POTASSIUM LAURATE	0.03
TOCOPHEROL	0.03
